<p>1. In the Settings page, tap on Connections</p>	<p>2. In the Connections page, tap on Mobile Networks</p>	<p>3. After tapping into the Mobile Networks page, tap on "Access Point Names"</p>

 <p>A screenshot of an Android phone's 'Access Point Names' settings page. The title bar shows a back arrow, 'Access Point Names', and an 'Add' button with a three-dot menu icon. The 'Add' button is highlighted with a red rectangular box. Below the title bar is a large, empty white rounded rectangle for adding a new APN. The bottom of the screen shows the standard Android navigation bar with three icons: a square, a circle, and a triangle.</p>	 <p>A screenshot of an Android phone's 'Edit access point' settings page. The title bar shows a back arrow, 'Edit access point', and a three-dot menu icon. Below the title bar are several settings fields, each with a label and a value: 'Name' (TPG), 'APN' (TPG), 'Proxy' (Not set), 'Port' (Not set), 'Username' (Not set), 'Password' (Not set), 'Server' (Not set), 'MMSC' (Not set), 'MMS proxy' (Not set), and 'MMS port' (Not set). The 'APN' field is highlighted with a red rectangular box. The bottom of the screen shows the standard Android navigation bar with three icons: a square, a circle, and a triangle.</p>
<p>4. Under the Access Point Names click on Add</p>	<p>5. Under APN, type in TPG and save (Can leave everything else blank)</p>
